

Market Returns During Election Years

Market Returns and Election Years

It is difficult to identify systematic return patterns in elections years.

On average, market returns have been positive both in election years and the subsequent year.

Market expectations associated with election outcomes are embedded in security prices.

Returns During and After Election Years

S&P 500 Index: 1928–2013

■ Average Return Year Subsequent to Election = 9.3%
 ■ Average Return During Election Year = 11.2%

Indices are not available for direct investment. Their performance does not reflect the expenses associated with the management of an actual portfolio. Past performance is not a guarantee of future results. Index returns are not representative of actual portfolios and do not reflect costs and fees associated with an actual investment. Actual returns may be lower. Source: The S&P data is provided by Standard & Poor's Index Services Group.
